## SKIN TYPES:

## KEY INGREDIENTS:

### Glycolic Acid

- Provides exfoliation and moisturization to help reduce the appearance of fine lines and wrinkles, while enhancing skin texture.

### Phytoene & Phytofluene

- Powerful antioxidants help further protect the skin.

### Caprylic/Capric Triglyceride

- Provides key moisturizing benefits.

### Polylysine (Dendriclear)

- Helps to maintain a healthy skin flora.

### Xylitol

- A sugar compound that helps hydrate and protect the skin.

### Perlite

- Naturally derived volcanic mineral that provides gentle exfoliating benefits.

# Skin Instantly appears smoother and brighter\*

**Female, Age 47**

ALASTIN Skincare® Regimen: ReSURFACE Skin Polish (used once a week); Gentle Cleanser, Ultra Light Moisturizer, and HydraTint SPF 36 Sunscreen.

Imaging Equipment: VISIA-CR (Canfield Scientific Inc., Parsippany, NJ). Images were taken with parallel-polarized lighting.

# 4 Key Education Focuses

---

## **What:**

- Helps to remove buildup of dead skin cells and impurities without stripping or irritating skin

## **How:**

- Dual Action Exfoliation (Glycolic and Volcanic Mineral)

## **Target Regimen:**

- Add to any current brightening regimen or daily anti-aging regimen ( helps other products work better by removing dead skin cells from surface)

## **Treatment Room:**

- Great addition to all facial treatment rooms to prepare the skin for treatment ( facial, dermaplaning, microneedling, etc. )
